

Specialized Equipment Coverage

Construction, Agriculture, Forestry Equipment

Across industries, getting the job done properly often requires specialized equipment with select features, custom designed parts, and highly skilled operators. At Safehold, our team understands the complexities of owning or leasing equipment and the unique exposures client's encounter. We proactively tailor a risk management program that addresses a range of risks that many carriers will not underwrite.

With more than 30 years of experience working with clients in these niche industries, the Safehold Equipment Program offers several key advantages. Our team of insurance experts manage equipment risk exposures, allowing us to leverage our in-house underwriters and adjusters who understand the nuances of equipment risk. Whether it's a single tractor or a schedule of mobile equipment worth millions of dollars, the Safehold Equipment Program provides access to specialized coverage options at competitive prices for the following industries.

- **Agricultural** | Tractors, plows, implements, side by sides, atv's
- **Construction** | Dozers, material lifts, excavators, forklifts, pavers, skid steers
- **Forestry** | Skidders, feller bunchers, yarders, sky cars, loaders
- **Wood Yards** | Chippers, delimiters, loaders

Target Classes of business

We serve a wide range of contractors' equipment-related businesses, including but not limited to:

- Row crop farming
- Hay farms
- Self-driving (autonomous equipment)
